EDUCATION

The Hong Kong University of Science and Technology (HKUST) **Hong Kong, Sep 2023 – June 2027**
BEng Computer Science + Extended Major in Artificial Intelligence – First Class Honours (Expected)

- **CGPA: 3.961/4.3** | ~ **Top 1% of HKUST Undergraduates** | 4x Dean's List | HKUST Full Scholarship Admission Holder
- Relevant Modules: DBMS (A+), C++ Programming (A+), OOP & Data Structures (A), Algorithms (A), Applied Statistics (A)

Methodist College Kuala Lumpur **Malaysia, Jan 2022 – June 2023**

- Awards: 4A* | Top in Malaysia in A-Levels Mathematics | Ranked 1st in Computer Science and Mathematics within the cohort

PROFESSIONAL EXPERIENCE

Zonic Tech – Full-Stack AI Engineer Intern **Hong Kong, June 2025 – Present**

- Leveraged OpenAI's Large Language Model to build a personalized accommodation recommendation system in Hong Kong using *LangGraph* framework, dynamically tailoring suggestions based on user preferences like location and budget.
- Built a custom AI state management system using nested *React* context architecture to replace Vercel's AI SDK RSC in company's codebase, achieving approximately 60% faster client-side updates by shifting state handling to the client-side, while optimizing server synchronization with *Redis* via debouncing.

Comptify Analytics – Analyst Programmer Intern **Hong Kong, June 2024 – Aug 2024**

- Spearheaded the development of an *SMTP*-based email verification tool using *Python* that identified 60% of invalid email addresses from the online-collected contact list, allowing the company to focus marketing efforts on the remaining 40% of potential clients.
- Initiated the development of a full-stack director remuneration analytics platform using *.NET framework* and *C#*, integrating *jQuery*, *HTML*, *Bootstrap* and *MySQL*, leveraging market data to analyse compensation trends and deliver strategic recommendations for clients to optimise their executive pay strategies.
- Proposed and executed the launching of a customizable comparison tool enabling clients, comprised of over 1,000 multinational companies, to benchmark their executive compensation against publicly listed companies of their choice, boosting company's revenue via a subscription-based model.

Zonic Tech – Frontend Developer Intern **Hong Kong, Dec 2023 – Jan 2024**

- Reconstructed the front-end of the website using *ReactJS*, enhancing user experience through the implementation of an intuitive user interface and the integration of key features utilizing *React Material UI* & *React Storybook*.

EXTRA-CURRICULARS

HKUST Computer Science Department - Undergraduate Teaching Assistant **Hong Kong, Jan 2025 – May 2025**

- Provided guidance on *C++* syntax and programming logic to 510 students in the Programming with C++ course, while assisting them in comprehending core computer science concepts, including pointers, object-oriented programming, and data structures.

Hong Kong Malaysian Student Association – Lead Webmaster **Hong Kong, Dec 2024 – Present**

- Led a team of 5 developers to revamp the web application by updating and creating profiles for board members, enhancing user information accessibility using *ReactJS*.

HKUST Southeast Asia Student Association – Internal Vice President **Hong Kong, Mar 2024 – Mar 2025**

- Led the coordination with the university administration, including event promotion, proposal development, and event organization.

PROJECTS

FoodMates (A peer-to-peer food delivery app for university students) – Lead Backend Engineer

- Co-developed a full stack mobile application designed for university students to order food and have other students deliver to them.
- Utilized *Supabase* for hosting the *PostgreSQL* database and *Firebase* for user authentication and hosting the *NoSQL* database.
- Developed a *RESTful API* backend with *Flask* and tested APIs using *Postman*.

HKUST Marketplace (An online platform for students to buy and sell second-hand goods) – Lead Backend Engineer

- Developed and deployed the backend with *Flask* on *Azure*, designing a robust *RESTful API* architecture that incorporates modularization and enhances maintainability through the implementation of the *Model-View-Controller (MVC)* design pattern.
- Utilised the *Gmail API* with *Python* to automatically send emails to sellers when users express interests in their product.

SKILLS & INTERESTS

• Technical:

- Programming Languages - JavaScript, HTML/CSS, Python, C#, C++, SQL
- Developer Tools – Firebase, Supabase, Postman, Vercel
- Libraries/Frameworks – Next.js, ReactJS, Flask, .NET, Bootstrap, PostgreSQL, SQLite

- **Languages:** English (Native), Mandarin (Fluent), Cantonese (Fluent), Malay (Fluent), Hakka (Basic)
